

DR INGRAM & PARTNERS

TRAVEL SERVICES

If you are planning a trip abroad, you can use the following website for travel advice for your destination.

<https://www.masta-travel-health.com>

Travel is a non-NHS service and we are reviewing the service that we currently offer. We are unable to offer travel vaccinations that are not funded by the NHS until further notice. We will continue to provide the following travel vaccinations which are available on the NHS for registered patients:

Tetanus, Diphtheria and Polio booster - 10 years protection

Hepatitis A - 25 years protection after 2 doses

Typhoid - 3 years protection

If you require one or more of these vaccinations you will need to book an appointment with a nurse for your immunisations. Please remember to book a telephone appointment in advance of your travel date to ensure that you receive the correct advice and treatment that might be required.

Please download and print the [Pre travel health questionnaire](#) and bring it with you to your appointment.

Please see below for details of alternative travel services in the area who can offer non-NHS travel vaccinations. There will be a charge for these vaccinations. It is important when travelling abroad that you have the appropriate travel advice, vaccinations, and anti-malarial medication.

If you require a computer print-out of your vaccination history to take with you to one of the alternative services, please contact reception to arrange this.
